Professional Summary

Full-stack software engineer with 5.5+ years of experience building scalable systems and enterprise applications. Expertise in React.js, Node.js, Spring Boot, and event-driven microservices with proven track record delivering high-performance systems.

Technical Skills

Languages: JavaScript, TypeScript, Java, Python, SQL, HTML5, CSS3
Frontend: React.js, Redux Toolkit, Storybook, Ant Design, Material-UI, Responsive Web Design
Backend: Node.js, Express.js, Spring Boot, RESTful APIs, Microservices Architecture, GraphQL
Databases: PostgreSQL, MongoDB, Redis, SQL Query Optimization, Database Design
Message Queues: RabbitMQ, Event-Driven Architecture, Asynchronous Processing

Professional Experience

Software Engineer III **December 2024 – Present**
HashedIn by Deloitte *Bangalore, India*

- Architected event-driven microservices architecture for enterprise Point-of-Sale system processing 10,000+ transactions per hour using Node.js, RabbitMQ, and Redis, achieving 99.9% uptime across 500+ retail locations
- Built modular React.js component library with TypeScript and Storybook containing 50+ reusable components, reducing UI development time by 40% across 3 product teams
- Designed and implemented RESTful APIs and WebSocket handlers in Node.js/Express for real-time inventory synchronization, payment processing, and hardware peripheral integration
- Implemented distributed caching layer with Redis reducing average API response time from 800ms to 120ms under peak load of 5,000 concurrent users
- Optimized message broker architecture reducing RabbitMQ queue processing latency by 60% through connection pooling and batch processing strategies

Software Engineer II **July 2022 – December 2024**
HashedIn by Deloitte *Bangalore, India*

- Engineered full-stack KYC verification platform integrating third-party identity providers (Jumio, ID Mission), Spring Boot microservices, PostgreSQL database, and React.js frontend serving 50,000+ monthly verifications
- Designed normalized database schemas and optimized complex SQL queries in PostgreSQL, reducing report generation query execution time by 60% through indexing and query refactoring
- Built CI/CD pipelines using Jenkins and Docker automating deployment of 12 microservices across development, staging, and production environments with zero-downtime blue-green deployments
- Developed responsive React.js web applications with Redux Toolkit state management for client onboarding workflows, reducing average onboarding time from 45 minutes to 15 minutes
- Reduced Redis cache memory footprint by 35% through TTL optimization and data structure refactoring while handling 2 million+ cache operations daily

Software Engineer I **March 2021 – July 2022**
HashedIn by Deloitte *Bangalore, India*

- Developed Java/Spring Boot microservices and React.js dashboards for Banking-as-a-Service platform, implementing 20+ RESTful API endpoints for account management, transaction history, and customer onboarding workflows serving 10,000+ daily active users

Full Stack Software Engineer Intern **September 2020 – March 2021**
SAFRAN *Bangalore, India*

- Built cross-platform employee management system using React.js, Flutter, Node.js/Express, and MongoDB deployed on AWS EC2, enabling 1,000+ employees to view directories and submit profile updates

Projects

DevPort - Developer Portfolio Platform | *React.js, Node.js/Express, MongoDB, Docker, AWS* **GitHub**

- Built and deployed a containerized full-stack SaaS platform enabling developers to create dynamic portfolios with real-time GitHub synchronization, JWT authentication, RESTful APIs, and MongoDB aggregation pipelines, serving 200+ active users with 99.5% uptime

Education

Christ University Faculty of Engineering **Bangalore, India**
Bachelor of Technology in Information Technology *June 2017 – June 2021*

- Relevant Coursework: Data Structures, Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Engineering
