Professional Summary

Full-stack software engineer with 3+ years of experience building scalable distributed systems and enterprise applications. Expertise in React.js, Node.js, Spring Boot, and event-driven microservices architecture. Proven track record delivering high-performance systems processing 10K+ transactions/hour with 99.9% uptime. Strong foundation in system design, RESTful APIs, database optimization, and modern DevOps practices.

Technical Skills

Languages: JavaScript, TypeScript, Java, Python, SQL, HTML5, CSS3
Frontend: React.js, Redux Toolkit, Storybook, Ant Design, Material-UI, Responsive Web Design
Backend: Node.js, Express.js, Spring Boot, RESTful APIs, Microservices Architecture, GraphQL
Databases: PostgreSQL, MongoDB, Redis, SQL Query Optimization, Database Design
Message Queues: RabbitMQ, Event-Driven Architecture, Asynchronous Processing
DevOps & Cloud: Docker, Jenkins, Git, AWS (EC2, S3, RDS), Nginx, CI/CD Pipelines
Testing & Quality: Jest, JUnit, React Testing Library, Postman, SonarQube, Unit Testing
Tools: VS Code, IntelliJ IDEA, Maven, npm, Jira, Confluence

Professional Experience

Software Engineer III **December 2024 – Present**
HashedIn by Deloitte *Bangalore, India*

- Architected event-driven microservices architecture for enterprise Point-of-Sale system processing 10,000+ transactions per hour using Node.js, RabbitMQ, and Redis, achieving 99.9% uptime across 500+ retail locations
- Built modular React.js component library with TypeScript and Storybook containing 50+ reusable components, reducing UI development time by 40% across 3 product teams
- Designed and implemented RESTful APIs and WebSocket handlers in Node.js/Express for real-time inventory synchronization, payment processing, and hardware peripheral integration
- Implemented distributed caching layer with Redis reducing average API response time from 800ms to 120ms under peak load of 5,000 concurrent users
- Led technical design reviews and code quality initiatives for team of 6 engineers, establishing TypeScript coding standards and testing practices achieving 85% code coverage
- Optimized message broker architecture reducing RabbitMQ queue processing latency by 60% through connection pooling and batch processing strategies

Software Engineer II **July 2022 – December 2024**
HashedIn by Deloitte *Bangalore, India*

- Engineered full-stack KYC verification platform integrating third-party identity providers (Jumio, ID Mission), Spring Boot microservices, PostgreSQL database, and React.js frontend serving 50,000+ monthly verifications
- Designed normalized database schemas and optimized complex SQL queries in PostgreSQL, reducing report generation query execution time by 60% through indexing and query refactoring
- Built CI/CD pipelines using Jenkins and Docker automating deployment of 12 microservices across development, staging, and production environments with zero-downtime blue-green deployments
- Developed responsive React.js web applications with Redux Toolkit state management for client onboarding workflows, reducing average onboarding time from 45 minutes to 15 minutes
- Implemented comprehensive testing strategy including JUnit for backend services (85% coverage), Jest for frontend components (80% coverage), and Postman collections for API integration testing
- Reduced Redis cache memory footprint by 35% through TTL optimization and data structure refactoring while handling 2 million+ cache operations daily

Software Engineer I **March 2021 – July 2022**
HashedIn by Deloitte *Bangalore, India*

- Developed Java/Spring Boot microservices for Banking-as-a-Service platform implementing 20+ RESTful API endpoints consumed by 5 downstream applications
- Built responsive React.js dashboards with Redux Toolkit for account management, transaction history, and customer onboarding workflows serving 10,000+ daily active users
- Integrated third-party banking APIs and payment gateways implementing robust error handling and transaction rollback mechanisms ensuring data consistency
- Collaborated with UX/UI designers translating Figma wireframes into pixel-perfect interfaces following atomic design principles and WCAG accessibility standards

- Mentored 2 junior developers on React.js best practices and Spring Boot development patterns through pair programming sessions

Full Stack Software Engineer Intern **September 2020 – March 2021**
SAFRAN *Bangalore, India*

- Built cross-platform employee management system using React.js web application and Flutter mobile app enabling 1,000+ employees to view directories and submit profile updates
- Developed RESTful backend APIs using Node.js/Express and MongoDB handling user authentication, profile management, and administrative workflows
- Deployed application on AWS EC2 with Nginx reverse proxy and automated SSL certificate renewal using Let's Encrypt

Projects

DevPort - Developer Portfolio Platform | *React.js, Node.js/Express, MongoDB, Docker, AWS* **GitHub**

- Built containerized full-stack SaaS platform enabling developers to create dynamic portfolios with real-time GitHub repository synchronization and contribution analytics
- Implemented JWT-based authentication system, RESTful APIs (15+ endpoints), and MongoDB aggregation pipelines for user analytics and activity tracking
- Deployed on AWS EC2 using Docker Compose orchestration with Nginx reverse proxy, automated SSL renewal, and CloudWatch monitoring
- Currently serving 200+ active users with 99.5% uptime tracked over 6 months with average API response time under 200ms

Real-Time Chat Application | *React.js, Node.js, Socket.io, Redis, PostgreSQL, Docker* **GitHub**

- Developed real-time messaging application supporting 1,000+ concurrent WebSocket connections using Socket.io and Redis pub/sub for horizontal scaling
- Implemented message persistence in PostgreSQL with full-text search capabilities and optimized queries for message history retrieval
- Containerized application with Docker and implemented horizontal scaling using Nginx load balancer distributing traffic across 3 Node.js instances

Education

Christ University Faculty of Engineering **Bangalore, India**
Bachelor of Technology in Information Technology *June 2017 – June 2021*

- Relevant Coursework: Data Structures, Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

Certifications & Achievements

- AWS Certified Cloud Practitioner (in progress)
- Completed LeetCode 200+ problems (Medium/Hard focus)
- Recognized with "Best Team Player" award Q3 2023 for cross-functional collaboration
- Active contributor to open-source projects with 500+ GitHub contributions in 2024
